RELEVANT EXPERIENCE

Freelance Front-End Web Developer

January 2014 - Present
Novato, CA

- Built five interactive websites with responsive designs for companies looking to adapt their online and social presence in the ever evolving digital landscape
- Used HTML5 and CSS3 in order to design and develop the basic structure of multiple landing pages from the ground up for three companies
- Utilized a combination of JavaScript, jQuery, and Bootstrap in order to incorporate responsive design and interactive functions in order to improve the user experience and customer engagement with the companies' web pages
- Advised and consulted the Uchiwa Japanese restaurant during the planning and development process for their new website by providing interactive demo web pages
- Built multiple landing pages for mobile tracking app WayNow's beta website by creating a basic wire frame with HTML5 and CSS3 and then incorporating additional digital content into the webpage using Bootstrap

LeafMedium

February 2012 - July 2012
San Francisco, CA

Co-Founder, Business Development

- Performed routine troubleshooting for possible issues with the LeafMedium website to ensure a seamless customer experience
- Debugged problems created from syntax errors and broken links for multiple client web pages on NodeJS within the realms of both back-end and front-end development
- Created live demos of web pages for client presentations using both the LeafMedium platform, HTML5, and CSS3 in order to showcase the capabilities and the ease of use that the LeafMedium platform offers prospective clients
- Advised and designed web pages using the LeafMedium platform for clients that required assistance with creating digital content
- Managed client relationships and provided systematic follow ups for potential clients by phone, email, and on-site presentations

Northern California Music and Arts Cultural Center

July 2011 - Present
San Francisco, CA

Volunteer Developer

- Designed and developed a website within a Ruby on Rails environment so that customers can download and view digital content such as showcasing upcoming events, and allowing customers to schedule classes directly from the client's web page
- Maintained and updated the web content as needed by the client and performed routine quality assurance maintenance to ensure the accessibility and responsiveness of the website
- Utilized HTML5 and CSS3 to create a visually appealing website by managing the design and layout of the information and digital content of the website

WORK EXPERIENCE

UCSF Mission Bay Bakar Fitness & Recreation

July 2010 - Present
San Francisco, CA

Receptionist

- Direct phone calls, schedule appointments, and manage a time frame for classes and other health related activities
- Provide excellent customer service over the phone or in-person for fitness patrons or prospective customers
